

Vaccine introduction & scale-up; link to primary health care (PHC)

Introducing and scaling up vaccines, including through integration with other PHC programmes to reach **under-immunised children and new population groups**

Reaching unreached communities

Reducing inequities by **reaching and fully immunising zero-dose children** in marginalised communities; leveraging opportunities for integrated **PHC services**

Programmatic & financial sustainability

Revamping eligibility, co-financing and transition models to ensure **programmatic and financial readiness for transition**; enhance immunisation outcomes in **former and never Gavi-eligible countries**

Pandemic prevention, preparedness & response (PPPR)

Supporting **country readiness and resilience** to the growing threat of outbreaks and pandemics; strengthening **supply readiness of outbreak and pandemic vaccines** and a **coalition of partners**

Climate change

Equipping countries to **adapt to and mitigate climate change impacts** through immunisation; and by building climate-resilient immunisation programmes and reducing the Vaccine Alliance's carbon footprint

Innovation in immunisation

Shaping markets and country-level investment to **catalyse and scale up innovations** that are crucial for accelerating delivery on Gavi's strategic goals

Operating model

Simplifying Gavi's operating model, including its funding levers and grant management processes

Localisation, collaboration & partnerships

Delivering in more **challenging country contexts** through **differentiated engagement and delivery partnerships** (inc. private sector); forging **regional partnerships**; and strengthening **purposeful coordination with global health institutions** and across sectors

Market shaping

Shaping markets to ensure healthy markets to optimise new programmes and prevent backsliding of mature programmes in the context of a more complex supply and demand environment
